

技術テーマ Technical Title **Zody Chair Back Assembly**

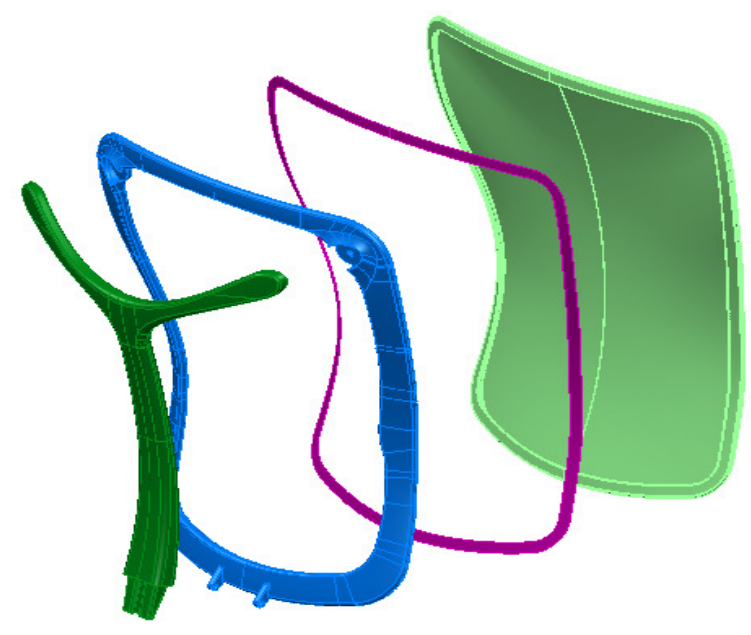

技術のポイント Describe Technical Detail
 Customer looking to finalize design of their revolutionary Zody chair back. They needed to select a supplier and then work concurrently to finalize the product design that is manufacturable and able to meet all target durability and reliability testing.

<従来構造/材料/工法等>
 <Current Material / Method / Structure etc.>

Initial concept design

- 2 piece structural frame
- Flexible ring sewn to fabric
- Ring / Fabric sub-assembly manually tucked into frame groove
- Visible mechanical fasteners attaching upright to frame

<新構造/材料/工法等>
 <New Material / Method / Structure etc.>

Final design

- Mesh fabric ultrasonically bonded to inner frame
- Inner frame/fabric are welded to outer frame
- Unique and patented back assembly process
- No visible fasteners
- Variable tension in different zones of back
